

TALMOS BRITANNICA COMPLIES WITH ALL OF THE LATEST INTEROPERABILITY STANDARDS.

PRODUCTS IN THE TALMOS SUITE INCLUDE:

Attendance

The latest and most sophisticated web based session and lesson attendance control software available, specifically designed to reduce workload and raise lesson attendance.

Classroom Manager

A simple web based interface designed to give teachers complete control of the programs and Internet websites available to students in an ICT classroom - giving you the peace of mind that ICT is being used appropriately and efficiently in your classrooms at all times.

Gateway

A flexible, web-based tool that has been designed to help schools administer their website and manage information for the public, pupils and parents through the Internet in a secure or public environment.

- Encyclopaedia Britannica is one of the worlds most comprehensive learning resources with over a million learning objects
- Talmos Britannica gives teachers and students instant access to four complete encyclopedias that ensure consistency with classroom topics and age-appropriate language. This unique database also offers high-quality online learning materials that are developed by teachers and curriculum experts. Designed for all levels of learning, Britannica Online School Edition offers students a gateway to the vast resources of Encyclopædia Britannica.
- Integrated searching of over 120,000 articles and multimedia.
- View over 30,000 graphics and animations, audio clips, and videos covering topics such as: Civil War, Dolphins, World War II, and more.
- Detailed maps of more than 200 countries.
- Spotlight features with study guides on topics such as Black History, Women's History, Normandy, and Shakespeare.
- Internet Guide that offers teachers and students easy access to the best sites available on the Web. Created by Britannica editors, it includes sites chosen based on their educational value and includes an emphasis on curriculum-based content.
- Journals and Magazines that locate the up-to-date information about classroom concepts and current events topics.
- Interactive Learning Materials that incorporate guides to language arts, mathematics, and science into the classroom. Core concept reviews, activities, images, and Web links are included.

SHARE AND IMPROVE LESSON PLANNING AND REDUCE TEACHER WORKLOAD

As an established player in the education sector, we know how important it is for teachers to be able to share knowledge and develop interactive learning resources to support students.

With collaborative working in education high on the DfES agenda, Talmos Britannica helps teachers share curriculum planning, lessons and resources between schools, whilst as a group they can develop powerful teaching programmes that deliver the best possible education to students using a wide range of learning tools - from video and animation to interactive suites and yes, even books!

TALMOS BRITANNICA IS A UNIQUE SOLUTION FOR TEACHERS TO

- Plan and deliver lessons
- Share lesson resources
- Collaborate in producing high quality lessons
- Generate schemes of work
- Evaluate the effectiveness of lessons
- Monitor teaching styles

* TALMOS, TEACHING AND LEARNING MANAGEMENT OPEN SYSTEM

"TALMOS IS ALLOWING EFFICIENT COLLABORATION BETWEEN STAFF AND BETWEEN SCHOOLS. THE BEST IDEAS AND MATERIALS ARE BEING MADE AVAILABLE IN EVERY CLASSROOM."

Brian Davies, Headteacher, Isaac Newton School, Hull

WHY CHOOSE TALMOS BRITANNICA

Talmos Britannica enable efficient collaboration and best practice teaching within individual schools, LEA and school clusters helping them to accelerate improvements in standards, and strengthen teaching and learning throughout the school.

The main feature of Talmos Britannica is the direct link into the Encyclopaedia Britannica database allowing teachers easily to add appropriate content into their lesson plans. This material includes encyclopedic content, images, videos, journals and high quality learning materials. Access to Britannica content is also provided to students (even remotely) and can be used as a valuable studying and researching tool.

Developed in conjunction with teachers, Talmos Britannica can be implemented a module at a time with enhancements that can be added as required.

From reducing lesson planning time and sharing best practices, to improving teaching and delivering engaging lessons, the Talmos Britannica platform is under constant development.

Talmos Britannica manages the planning and resource maintenance functions of the school or individual teacher by providing a platform for entering resources and lesson plans into a database. Lesson plans can be built up in a structured way using lesson components added by the school or, where the school is part of a Talmos Britannica cluster, added by other members (such as a subscribing Education Authority or other schools in the group).

Talmos Britannica addresses consistency and time saving concerns for teachers producing plans and managing materials in the classroom environment.

Talmos Britannica presents schools with an open, adaptable way to promote individual teaching and learning in a consistent way that is easy to produce, measure and deliver. Closely centred around teaching, Talmos Britannica gives teachers the ability to bring the most authoritative content into everyday teaching and for pupils freely to expand their horizons at their own pace.

“WHEN ALLIED WITH OUR NEW ICT INFRASTRUCTURE, TALMOS BRITANNICA GIVES OUR TEACHERS AN INTEGRATED PLANNING AND DELIVERY SYSTEM: DIGITAL RESOURCES ATTACHED TO LESSON PLANS ARE AVAILABLE IN THE CLASSROOM AT THE CLICK OF A MOUSE.”

Brian Davies, Headteacher, Isaac Newton School, Hull
